

WENDT USA'S UNIQUE GRINDING SOLUTIONS

CornerFlex - Designed to grind corners & contours with high flexibility & more useable abrasive material.

Applications: Maintenance / Job Shops / Power Generation / Motor Sports / OEM / Production

Threaded Abrasives Flap Wheel - Utilizes a 5/8-11 thread for quick mounting on angle grinders. Suitable for general grinding on contours.

Applications: Maintenance / Job Shops / Power Generation / Tank & Vessel Production / OEM

Trizact™ Cartridge Rolls - Trizact™ Straight Cartridge Rolls are the first choice when fine finishing is needed in tight spaces.

Applications: Mold & Die Shops / Job Shops / Aerospace / Orthopedic / Medical

Mini Flap Wheels - Wendt produces some of the smallest, highest quality mini flap wheels in the world. Designed for hard to reach applications.

Applications: Machine Shops / Job Shops / Fabricators / Aerospace / Orthopedic / Medical

Ceramic Flap Wheels - Utilizing a grinding aid to reduce heat, these wheels grind stainless steel, titanium, & high nickel alloys with ease.

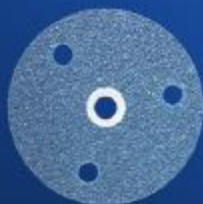

Applications: Machine Shops / Power Generation / Aerospace / Petroleum / OEM

Trizact™ is a registered trademark of the 3M company.

Together one finish ahead!

WENDT USA'S PATENTED PROBLEM SOLVERS

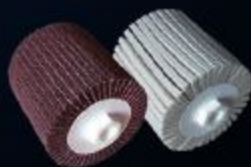

TWINPOWER - This double sided disc is a unique solution for edge beveling, finishing narrow channels or grooves, & removing welds. Both sides of the disc can access & grind hard-to-reach areas. TWINPOWER is the go-to tool for a wide range of difficult applications. (Available in Zirconia grain.)

Flap Bands - This powerful tool provides aggressive stock removal in confined spaces: Replacing spiral bands, carbide burrs, mounted points, flap wheels, plugs & cones when controlled aggression is needed. Ideal for grinding & finishing inside pipes & tubes. (Available in Zirconia & Ceramic grains.)

Felt Products - These products are made of 70% wool felt & replace cotton bobs, buffs, cotton wheels, cotton discs, & solid felt points for polishing applications. Used in conjunction with polishing compounds, pastes, or rouges to produce up to a mirror finish on a variety of materials.

Flap Rolls - These products have a wide profile (up to 4") which makes them an ideal accessory for grinding, finishing, & polishing large surface areas. Their rotation provides a linear surface finish, as opposed to the swirl pattern produced by discs. (Available in coated, nonwoven, & felt materials.)
